

Release Notes for Mac DiscRibe

5.3.27 05-30-2007

Feature - Added ability to use higher capacity color cartridges in the Imation D20.

(Requires Firmware and Driver update to latest version)

5.3.24 02-14-2007

1. Added support for DVD-R Dual Layer burning
2. Fixed Burn End logging, so it now shows the correct time spent burning.

5.3.23 1-8-2007

1. Added better logging to Username\Documents\DiscRibe.log
2. Added Job Completed message to end of job.
3. Write speed is preserved for jobs in Job Queue. If a DVD or CD is in the robot's input when a CD or DVD write speed was selected (in other words incorrect media (a DVD when the user intended to put a CD, or a CD when they intended to burn DVDs) was in the input), the burn proceeds at the maximum speed as a default.

5.3.14 2-14-2006

1. Fix issue with finished good discs printed with nothing burned
2. Add registration
3. Robot Write button changed to Burn

5.3.1

Fixed minor issue with Queued DVD Image jobs taking a long time to burn

5.3.9

1. Fixed issue with adding Video TS folder in DVD Video Audio Job. Only affects users on OSX 10.4 or higher.
2. XR Support added
